

The supervisory board of the Kestcells Project announces the Seminar NEXCIS-01:

“Luminescence Techniques for Solar Cells Characterization”

Dates: 30th of June, 2014.

Place: NEXCIS, 190 Avenue Célestin Coq, 13790 ROUSSET, FRANCE

Summary: In this seminar the Luminescence Techniques for Solar Cells Characterization will be reviewed.

Program

Time	Subject	Speaker
14:00-15:00	Quantitative Imaging of Solar Cells Properties Using Luminescence Characterization Methods	Laurent Lombez, IRDEP
15:00-16:00	Photoluminescence for Quality Control of Chalcogenide Thin Film Solar Cells	Thomas Goislard, NEXCIS

N.B.: People from outside Nexcis wanting to attend this seminar must send an e-mail to: thomas.goislard@nexcis.fr
