

The supervisory board of the Kestcells Project announces the Seminar NEXCIS-02:

## “Low-cost approaches for CZTS solar cell manufacturing”

**Dates:** 17<sup>th</sup> of December, 2014.

**Place:** NEXCIS, 190 Avenue Célestin Coq, 13790 ROUSSET, FRANCE

**Summary:** In this seminar two approaches towards CZTS solar cell manufacturing at low cost will be presented, namely spray-coating and electrodeposition based approaches.

### Program

Time	Subject	Speaker
14:00-15:00	Investigations of loss mechanisms in 9% CZTSSe solar cells spray coated from a water-ethanol based ink	G. Larramona, IMRA Europe
15:00-16:00	8.2% efficiency $Cu_2ZnSnSe_4$ thin film based solar cell from large area electrodeposited precursors	L. Vauche, NEXCIS

N.B.: People from outside Nexcis wanting to attend this seminar must send an e-mail to: [thomas.goislard@nexcis.fr](mailto:thomas.goislard@nexcis.fr)
