

The supervisory board of the Kestcells Project announces the Seminar NU-02:

“Electrical Characterisation of Interfaces”

Date: Monday 17th March 2014.

Place: Department of Physics & Electrical Engineering Faculty of Engineering & Environment, Northumbria University, Ellison Building, Newcastle upon Tyne.

Summary: In this seminar the methods used to electrically characterise interfaces will be discussed. These will include C-V measurement, I-V measurement, photo-capacitance, admittance spectroscopy and deep level transient spectroscopy (DLTS)

Program

Time	Subject	Speaker
10.00-12.00:	Seminar and discussion	Prof. Robert W. Miles
